

MES Power Lock Kits

OEM Standard MES Actuators

OEM Standard MES Actuators used as power lock for new work, or will retro-fit all OEM door locking configurations. Kits designed to allow for installation on every OEM door or tool box configuration.

MES-2D:

Retrofits OEM door locking configurations and converts to power locking. Includes (2) key activated actuators, hardware, timed relay, wiring harness and installation instructions. RC35 Keyless Entry sold separately.

MES-4D:

Retrofits OEM door locking configurations and converts to power locking. Includes (4) key activated actuators, hardware, timed relay, wiring harness and installation instructions. RC35 Keyless Entry sold separately.

Keyless Entry Options:

By adding one of the following controllers, PLW10-RC, PLW10, PLRB, RC35a or Pro Controller, power door locking becomes keyless entry. Switching is also made easy with Flex Switch wireless communication. It eliminates time-consuming wiring from cab to body.

Tool Boxes & Cab Power Locks
